Supply, Installation & Commissioning of Smart Classrooms in 6 Rural Schools

SURE – Sakhi Unique Rural Enterprise

SURE invites Expressions of Interest (EOI) from qualified and experienced vendors for the supply, installation, and commissioning of Smart Classroom systems in 6 selected rural schools across different villages. The initiative aims to enhance the quality of education by integrating digital learning tools and interactive teaching methods in rural schools.

Project Overview

Many rural schools face limitations in accessing modern educational resources and digital learning tools. To address this gap, SURE plans to establish Smart Classrooms in 6 schools to improve student engagement, digital literacy, and teaching effectiveness.

Each Smart Classroom should include the following components (or equivalent):

- Interactive display / Smart board or Interactive Flat Panel
- Projector with screen (if required)
- Computer / CPU for content operation
- Audio system with speakers
- Digital learning content compatible with school curriculum
- Required cables, mounting, and installation accessories
- Minimum 3–5 year warranty

Scope of Work

1. Supply & Installation

- Supply of complete Smart Classroom equipment for 6 schools.
- Installation at designated classrooms in selected villages.
- System testing, commissioning, and demonstration to school staff.

2. Training & Support

- On-site training for teachers on using the smart classroom system.
- User manuals and operational guidelines.
- Technical support during the warranty period.

3. Quality Standards

- Equipment must meet standard quality certifications.
- Warranty: Minimum 3–5 years including service support.

4. Delivery Timeline

Vendor must ensure timely delivery and installation as per mutually agreed schedule.

5. Payment Terms

To be finalized after vendor selection (indicative: linked to supply, installation, and successful commissioning).

Vendor Qualification Requirements

- Minimum 3–5 years of experience in Smart Classroom / EdTech installations.
- Proven track record of similar projects in schools or educational institutions.
- Ability to provide reliable service and technical support.
- Capacity to deliver high-quality equipment and digital solutions.

Evaluation Criteria

- Technical specifications and quality of equipment
- Past experience and project references
- Compliance with warranty and service commitments
- Financial competitiveness
- After-sales service capability

Submission Requirements

- Company profile and past experience
- Technical specifications of proposed Smart Classroom equipment
- Quotation for 6 Smart Classroom setups including GST
- Delivery and installation timeline
- At least two references from previous projects
